Office Action Summary	Application No. 10/700,269	Applicant(s) MAZZONE, THOMAS JOSEPH	
	Examiner Chuck Mah	Art Unit 3676	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. A paper filed on Aug. 31, 2004, directed to an unrelated invention "A Flat Platform", is found within the current file. Apparently the paper is filed mistakenly by applicant and therefore it will no longer be considered by the examiner as part of the invention. The examiner will only consider the invention originally filed—"Wedge With Push Rod and Handle".

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 2, "andparallelisms" is misspelled. Lines 4-5, "the surface", "the tip", "the opposite rear side" and "the adjacent surfaces" are vague and indefinite without first defining the geometry of the wedge. That is, for example it is not clear what is being defined as "the surface" or "the adjacent surfaces".

Lines 9-10, it cannot be understood how "the rod" is structurally linked to the wedge.

Further, for lines 3, 6, and 8, a period "." cannot be used before the end of the claim since a claim consists only a single sentence. Note similar error in claim 2.

In claim 2, line 3 reiterates an additional "furniture cup". It is not clear whether the cup is referred to the same in claim 1 or referred to an additional element.

In claim 3, lines 2-3, "the said push rod and handle" is not understood. Neither claim 1 nor claim 3 defines a "push rod" or "handle".

In claim 4, lines 1-2, "said wedge and coupling" is not understood. Claim 1 does not have a "coupling". For examination purpose the claim is treated as depending from claim 2.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1 and 3, as best as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Stuart (3,601,438) in view of Bisher (4,958,869).

'438 discloses the invention as claimed but for a rod attached to the wedge. '869 teaches a wedge have a rod with a cup attached thereto for assisting in holding and carrying. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the wedge of '438 with a rod attached to it as taught by '869 to assist holding and carrying.

6. Claims 2 and 4 may be given favorable consideration if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
